# Oak Laminate Patio Door

Now, choosing  
the right door  
is an open and  
shut case.

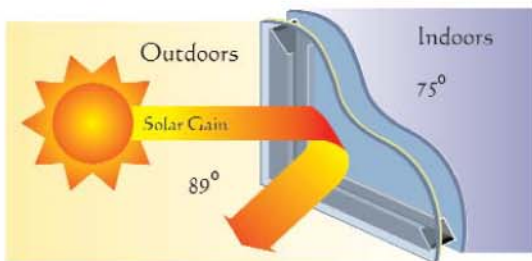

## Built for comfort and energy efficiency

Thermal performance is an important factor to consider when purchasing a window. The Stanley® Pro-Fit Oak Laminate Patio Door includes a number of standard features which help to keep your home comfortable and energy efficient, while reducing energy costs.

### LoE<sup>2</sup> Glass

The Stanley® Pro-Fit Oak Laminate Patio Door includes LoE<sup>2</sup> Glass which provides year-round comfort and energy savings. It consists of two thin, transparent metallic coatings which are applied to the glass to selectively filter solar radiation. During the summer, LoE<sup>2</sup> Glass reduces heat gain, keeping your home cooler. LoE<sup>2</sup> Glass helps keep you warmer in the winter by reflecting heat back into your home.

#### Summer Energy Savings and Comfort

In the summer, LoE<sup>2</sup> Glass lets in visible sunlight while blocking infrared and ultraviolet energy, reducing cooling costs and fading and/or damage to furnishings.

#### Winter Energy Savings and Comfort

In the winter, LoE<sup>2</sup> Glass reduces heating costs and keeps you warmer by reflecting roomside heat back into the home.

### The ENERGY STAR® Program

The U.S. Department of Energy and the U.S. Environmental Protection Agency have developed the ENERGY STAR® program to help consumers easily identify products that save energy. Stanley® Pro-Fit Windows offer several glazing options to meet or exceed the program guidelines. ENERGY STAR® windows can help reduce annual heating and cooling costs by as much as 15%.

### NFRC Certified

All Stanley® Pro-Fit windows are certified by The National Fenestration Rating Council. The NFRC has established guidelines for testing and comparing the thermal performance of the entire window. This is the most reliable method of determining a window's energy saving ability.

## Affordable Elegance

The Stanley® Pro-Fit Oak Laminate Patio Door utilizes a selection of innovative materials that provide stunning beauty at a surprisingly reasonable price. A medium oak interior laminate provides the warm look of wood without the associated maintenance. The 3M™ Accentrim® product, applied in a prairie pattern, creates the look of “V” groove glass without the added cost or strength limitations. An elegant brass plated handle compliments the sophisticated look of this unique product.

## Features and Benefits

- Heavy duty vinyl construction is strong, durable and virtually maintenance free. Vinyl does not rot, peel, flake or corrode - therefore never requires painting.
- Medium oak vinyl laminate provides the warm, attractive look of wood and never needs to be painted or stained.
- Fusion welded, steel reinforced panels with full interlocks create a virtually weather tight seal, helping to eliminate drafts.
- Double weatherstripping helps to eliminate air, water and noise infiltration.
- 1" insulated LoE<sup>2</sup> Glass for year-round comfort and superior thermal performance.
- 3M™ Accentrim® product creates the beauty and elegance of “V” groove glass without the added cost and structural limitations. The Accentrim® product applied in a prairie design, maintains a large viewing area.
- Warm Edge Intercept® Spacer reduces condensation and improves performance.
- Deluxe brass-tone interior handle enhances the elegant appearance of the door.
- Rolling screen included.
- **LIMITED LIFETIME WARRANTY.**
