Simply Great Windows

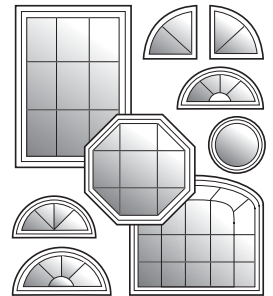

The Obvious Choice

The Stanley Preferred New Construction Single Hung Window combines beauty, convenience, and energy efficiency. It's loaded with features like 7/8" insulated glass, heavy duty vinyl construction and a tilt-in sash. Matching slider windows, picture windows, and architectural shapes offer numerous design options. All of this makes the Preferred Window a perfect choice for any new construction project.

Picture Windows & Geometric Shapes

Enhance other window designs while adding light, style and warmth to your home. Our extensive line of picture windows, half circles and geometric shapes creates an endless array of design possibilities. All of these window styles feature the same low maintenance, energy efficient performance and aesthetic appeal as their companion single hung windows.

Features

- Heavy duty, fusion welded vinyl construction is strong and durable, for a lifetime of performance. It will not rot, chip or peel, and therefore requires little maintenance.
- Beveled exterior profile adds beauty and curbside appeal.
- Integral 1 1/4" nailing fin for easy installation into frame/stick construction.
- Double weatherstripping helps eliminate air, water and noise infiltration.
- 7/8" insulated glass is energy efficient. Optional LoE² glass and Argon gas are available for the ultimate in year-round comfort and energy savings.
- Optional color-coordinated grilles are sealed inside the glass for easy cleaning.
- Tilt-in bottom sash for easy cleaning from inside the home.
- Continuous, contoured integral lift rail for easy and reliable operation of sashes.
- Cam type lock(s) and keeper(s) draw meet rails together for a tighter seal.
- Roll form screen for bottom ventilation. Clear viewing area at the top.
- LIFETIME WARRANTY

Tilt-in Sash

Optional Grilles in white or beige

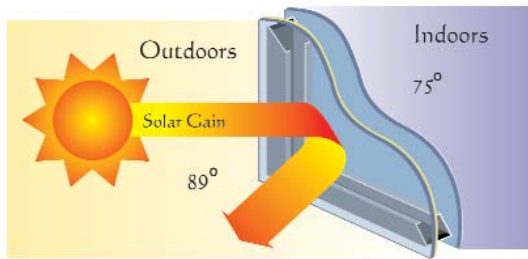

Built for comfort and energy efficiency

Thermal performance is an important factor to take into account when purchasing a window. The Stanley Preferred New Construction Single Hung Window includes a number of standard features and available options which help to keep your home comfortable and energy efficient, while reducing energy costs.

LoE² Glass

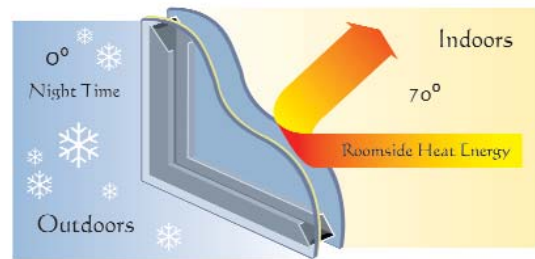

The Stanley Preferred New Construction Single Hung Window is available with LoE² Glass which provides year-round comfort and energy savings. It consists of two thin, transparent metallic coatings which are applied to the glass to selectively filter solar radiation. During the summer, LoE² glass reduces heat gain, keeping your home cooler. LoE² glass helps keep you warmer in the winter by reflecting heat back into your home.

Summer Energy Savings and Comfort

In the summer, LoE² glass lets in visible sunlight while blocking infrared and ultraviolet energy, reducing cooling costs and fading/damage to furnishings

Winter Energy Savings and Comfort

In the winter, LoE² glass reduces heating costs and keeps you warmer by reflecting roomside heat back into the home.

Setting **New** Standards!

THERMAL PERFORMANCE Tested to NFRC 100-97

7/8" Clear glass	U Value = 0.50
7/8" LoE ² glass	U Value = 0.36
7/8" LoE ² w/Argon	U Value = 0.32

STRUCTURAL PERFORMANCE Tested to AAMA/NWWDA 101/1.S.2-97

45" x 60"	H-R50
45" x 72"	H-R25

The Energy Star® Program

The U.S. Department of Energy and the U.S. Environmental Protection Agency have developed the Energy Star program to help consumers easily identify products that save energy. Stanley Pro-Fit Windows offer several glazing options that meet or exceed the program guidelines. Energy Star windows can help reduce annual heating and cooling costs by as much as 15%.

NFRC Certified

All Stanley Pro-Fit windows are certified by The National Fenestration Rating Council. The NFRC has established guidelines for testing and comparing the thermal performance of the entire window. This is the most reliable method of determining a window's energy saving ability.
