Simply Great Windows

Choosing great windows is a breeze.

You already rely on Stanley for high-quality tools, storage systems and other hardware and home décor products and accessories. Now, Stanley brings that same craftsmanship and dependability to windows with its new Pro-Fit line.

We want to shatter your expectations.

While we're new to windows, we're no rookies. In fact, Stanley has been exceeding expectations since 1843 and we don't plan on stopping anytime soon. The Stanley Pro-Fit series delivers beauty, endurance, efficiency, convenience and value. And that should make you feel warm all over.

Tired of high heating & cooling costs? We've got the solution.

You probably want to replace your windows for primarily two reasons. First, you're probably tired of feeling the north wind blow through your living room. Just as important, you want to upgrade the curb appeal of your home. Stanley's Premium Double Hung Window gets the job done on both fronts.

Clearly the best...

Numerous standard features create an unparalleled window value. As you'll see, the Stanley Pro-Fit Premium Double Hung stands tall alongside any window on the market today:

FEATURES:

- Strong, durable fusion welded vinyl construction for a lifetime of maintenance-free performance. Never requires painting.
- Exterior colonial profile provides a traditional, elegant detail and curbside appeal.
- 3-1/4" frame for easy blindstop replacement.
- Head expander and sill angle insure a proper fit.
- Sashes tilt inward for easy cleaning from inside the home.
- Double weatherstripping helps eliminate air, water and noise infiltration.
- 7/8" insulated glass is energy efficient. Optional LoE² glass and Argon gas available for the ultimate in year-round comfort and energy savings.
- Constant force balance system for smoother, easier operation.
- Flush mount tilt latches provide a cleaner, more attractive appearance to the window.
- Spring loaded vent latches are stronger and much easier to activate.
- Heavy duty, extruded aluminum locking half screen included. Full screen available.
- Can be ordered to meet or exceed ENERGY STAR[®] guidelines.
- Lifetime Warranty

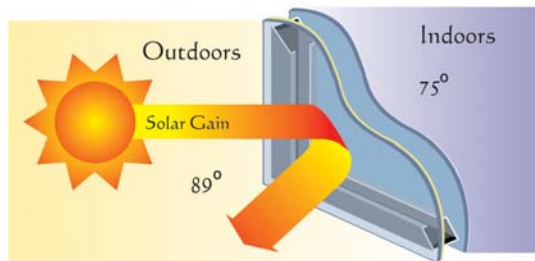

Built for comfort and energy efficiency

Thermal performance is an important factor to take into account when purchasing a window. The Stanley Pro-Fit Premium Double Hung includes a number of standard features and available options which help to keep your home comfortable and energy efficient, while reducing energy costs.

LoE² Glass

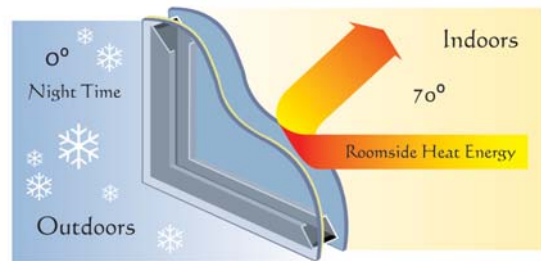

The Stanley Pro-Fit Premium Double Hung has standard LoE² Glass which provides year-round comfort and energy savings. It consists of two thin, transparent metallic coatings which are applied to the glass to selectively filter solar radiation. During the summer, LoE² reduces heat gain, keeping your home cooler. LoE² Glass helps keep you warmer in the winter by reflecting heat back into your home.

Summer Energy Savings and Comfort

In the summer, LoE² glass lets in visible sunlight while blocking infrared and ultraviolet energy, reducing cooling costs and fading/damage to furnishings

Winter Energy Savings and Comfort

In the winter, LoE² glass reduces heating costs and keeps you warmer by reflecting roomside heat back into the home.

Setting **New** Standards!

THERMAL PERFORMANCE Tested to NFRC 100-97	
7/8" Clear glass	U Value = 0.48
7/8" LoE ² glass	U Value = 0.35
7/8" LoE ² w/Argon	U Value = 0.31

STRUCTURAL PERFORMANCE Tested to AAMA/NWWDA 101/1.S.2-97	
44" x 60"	H-R45
48" x 80"	H-LC30

The Energy Star® Program

The U.S. Department of Energy and the U.S. Environmental Protection Agency have developed the Energy Star program to help consumers easily identify products that save energy. Stanley Pro-Fit Windows offer several glazing options to meet or exceed the program guidelines. Energy Star windows can help reduce annual heating and cooling costs by as much as 15%.

NFRC Certified

All Stanley Pro-Fit windows are certified by The National Fenestration Rating Council. The NFRC has established guidelines for testing and comparing the thermal performance of the entire window. This is the most reliable method of determining a window's energy saving ability.
